I am an ambitious and naturally curious software developer with a background working in a multidisciplinary team as a Physiotherapist with high-performance athletes in the Bulgarian National ski team. My strong analytical and organisational skills due to my background as a diagnostic practitioner and my desire for knowledge made the decision to move into Software Development very straightforward. Currently enrolled in CodeClan Professional Software Development training I am looking forward to joining the Scottish tech ecosystem.

Projects

- **Space Saga**- Full stack MERN educational game.

Developed in the span of 1 week as a collaboration between 4 people with the goal of creating a space education interactive game application consisting of a quiz element and an interactive game element. ReactJS, Express, Node, MongoDB, CSS, Restful API, External API were utilised and Agile methodologies were used in the planning process.

https://github.com/treneff/space_explorers

- **Trenello** - Full stack Python task manager

Developed with inspiration from task management softwares as a solo project in the span of 1 week utilising technologies such as SQL, Python, Flask, Jinja, CSS. The application was developed mobile first.

https://github.com/treneff/trenello_task_manager

- **Budgeten**- JavaScript Budget calculator

Developed as a solo vanilla JavaScript project and used as an opportunity to establish a clear understanding of data flow within a program and solidify javascript syntax and DOM interactions. Full consideration was taken to the app's mobile responsiveness.

<https://github.com/treneff/Budgeten>

- **Flags Shop E-commerce**- ReactJS e-commerce app

Developed as a paired project to solidify team work, team planning, development collaboration, dataflow and state management in React.

https://github.com/treneff/flags_marketplace_react

Skills

- ReactJS
- JavaScript
- Node.js
- Express.js
- MongoDB
- Agile
- CSS
- HTML
- Python
- Flask
- SQL
- Java
- Spring
- API
- Git

Hobbies

- Mountain biking(building, fixing and riding)
- Climbing
- Hiking
- Camping
- Quizzes
- League of Legends

Technical Education

- CodeClan Professional Software Development SVQ Level 8: 10/2022 - 02/2023

A full stack intensive software development SQA accredited course spanning throughout 16 weeks with dedicated for Python(5 weeks), JavaScript(7 weeks), Java(4 weeks) and covering technologies/libraries such as ReactJS, Node, Express, MongoDB, SQL, Flask, Git, Github.
